

**2011 RIVERFEST VENDOR ELECTRICAL NEEDS FORM**

Please fill out this form as accurate as possible to make Riverfest start out as smoothly as possible. This form must be filled completely and returned or your equipment will not be provided with electricity. Do not write "Same as last year". Due to time constraints, once set up begins, it is nearly impossible to change the amount and type of power available in most areas.

Please take the time to look at the cord and plug on each piece of equipment and mark down what type it is, or you can draw a picture of what it looks like.

The voltage (volt) and current (amperage) or wattage rating of equipment is critical to make sure that we have the proper amount and type of power available to you.

Note: NO 3 PHASE POWER IS AVAILABLE

TYPE OF EQUIPMENT	110 VOLT RATED		220 VOLT RATED	
	# OF PIECES	AMPERAGE	# OF PIECES	AMPERAGE
EX: Stand up Refrigerator	2	15 each		
EX: Deep Fryer			2	50 each

5.				
6.				
7.				
8.				

Operations with excessive 220 volt or special needs may be required to make other arrangements at your cost dependent upon the best interest of Riverfest and the food fair.

All special plugs and receptacles that may be required for your equipment must be provided by you at your cost for your equipment.
